Tuesday 9 July 2013

Innovation in Brazil: Knowledge in action

In Brazil, in the course of the past half decade, innovation has definitely entered the economic policy and the science and technology (S&T) agendas, respectively with the reaffirmation of its role in the new industrial policy and its addition to the ministry's name: Ministry of Science, Technology and Innovation (MCTI).

"Innovation to compete; Compete to grow", is the motto behind the industrial policy Greater Brazil Plan, and "Innovation: applying knowledge for development" becomes a priority of the "National strategy for science, technology and innovation", both plans launched in 2011.

Our workshop, 'Innovation in Brazil: Knowledge in action' aims to discuss the innovation mood across government, academia and business spheres. The speakers will present their experience from the perspective of a major federal research university, a state research funding agency and a state federation of industries. They will relate their own experiences, with the state, academia and business interface, current bottlenecks, opportunities and achievements in innovation in Brazil.

Speakers

JOSÉ MANOEL CARVALHO DE MELLO, Ph.D. (Chair)
Visiting Professor,
Innovation Agency Advisor,
Fluminense Federal University - UFF
